

# ARO

## *Pro Series Diaphragm and Piston Pumps*

**Ideal for General Industrial and OEM installation applications.**

Non-Metallic and Metallic Diaphragm Pumps  
Low-Ratio Piston Pumps  
Specialty Pumps

**IR** Ingersoll Rand  
Industrial Technologies

# Introducing the New High-Performance Pro's: PD05, PD03

Unbalanced valve design eliminates valve centering and pump stall-out-even under low air inlet pressures.

## "D" Valve

- ▷ Provides a positive seal.
- ▷ Helps insure optimum energy efficiency while avoiding costly air "blow-by."
- ▷ Ceramic construction insures long service life.

## "SimulShift™" Valve

- ▷ Provides an ultra-positive, reliable shift signal that avoids stall-out.
- ▷ Provides faster pump trip-over with more flow.
- ▷ Faster trip-over with less pulsation and superior laminar material flow.

### Diaphragm Moving Right to Left

- 1.) The diaphragm pushes the right Actuator Pin (B) mechanically moving the SimulShift Valve (A) to the left.
- 2.) Compressed air flows to the large side of the SimulShift Valve, pneumatically moving the valve to the position shown.
- 3.) Compressed air also flows to the large end of the Major Air Valve (C), pneumatically shifting it to the left.

### Diaphragm Moving from Left to Right

At end of stroke:

- 1.) Diaphragm pushes Pin (B) and SimulShift Valve (A) to the right.
- 2.) Large ends of SimulShift Valve (A) and Major Valve (C) are vented to exhaust pilot signal.
- 3.) Constant compressed air supply acting on the smaller areas of the SimulShift Valve and Major Valve shifts both valves to the right and holds them in position until the next cycle begins

# ***Big Delivery. High-Performance.***

The best-selling 1/2-inch diaphragm pump in the world, just got better!

## ***Productivity***

Maximized flow rates + Minimized pulsation and air consumption = Maximum Performance

## ***Versatility***

Multiple porting options available along with interface options allow you to customize this pump specifically to your OEM application.

## ***Reliability***

Lube Free Patented Differential Valve both on Major air valve and Simulshift (Pilot Valve) provides reliable Worry Free Operation – Fluid On demand every time

## ***Environmentally Sound***

Bolted Construction in conjunction with a wide range of material options provides maximum chemical and leak resistance

## ***Serviceability***

Modular Construction, reduced parts count and simple to use repair kits will minimize repair time and cost

**Don't forget the other compelling reasons to use ARO Diaphragm Pumps:** ARO Diaphragm pumps are simple to apply to your application because they are self priming and can be run at variable flows controlled by air pressure or fluid back pressure. They can handle materials that are abrasive and/or shear sensitive. They can also be run dry without damage to the pump.

## Accessories

### Air Line Connection Kit\*1 Kit No. 66073-2

Kit includes Piggyback Filter/Regulator with gauge, pipe nipple and a 5-foot section of air hose.

**Service Repair Kits** | Kit No. 637118-C (air section)  
Kit No. 637161-XX-C (fluid section)

### Flange Connection Kit | Kit No. 67078 (for 1" Non-Metallic Pumps)

For pumps with inlet/outlet flange manifolds. Kit meets ANSI specifications. Flange constructed of glass-filled polypropylene. Bolts, washers and nuts are stainless steel. Gasket is 4401 klinger synthetic fiber nitrile binder.

\*Please note pumps are not included with these kits.

## Value Proposition Pro-Series Pumps

### ARO Diaphragm Pumps: Keys to ARO Air Motor Technology

#### [1] “Unbalanced” Major Air Valve

- Unbalanced valve design eliminates valve centering and pump stall-out, even under low air inlet pressures.
- “O” Ring seals prevent waste of expensive compressed air. Air flow stops when fluid flow stops.
- Maintenance is simple: just replace the worn “O” Rings and “U” Cups.

#### [2] Independent Pilot Rod

- Utilizes pneumatics and mechanical action to shift Pilot Rod. Ensures positive pilot signal, avoiding stall-out.

#### [3] Broad Material Selection

- Options allow you to optimize compatibility between the pump and fluid being moved.
- Non-Metallic Diaphragm Pumps are available in polypropylene, PVDF and groundable acetal. Check models for availability.
- Metallic Diaphragm Pumps are available in aluminum, stainless steel and cast iron. Check models for availability.

#### [4] Diaphragm/Ball Check Options

- Fit your pump with the diaphragms and ball checks needed to maximize fluid compatibility and abrasion resistance.

**Introducing the New High-Performance Compact: PD05, PD03, PD07:** Aro’s new Pro Series family has all new members at both ends of the delivery spectrum. In the low-to-medium flow range, we offer our new PD05 (1/2”) and PD03 (3/8”) models. Featuring our patented air valve technology, including SimulShift and D-Valve designs, users are assured of stall-free operation, with optimum energy efficiency. These pumps also feature fluid deliveries previously unavailable in port sizes like these: 14.4 GPM (1/2”) and 10.4 (3/8”)...that’s impressive delivery in a small package! ARO pioneered the 1/2”, high-demand, low-maintenance diaphragm pump in the eighties -

now its time to step it up-with the new Pro PD0s.

**Introducing the New High-Flow Pro’s: 66622XX and 66633XX:** At the far end of the fluid delivery spectrum, the new ARO Pro Series 2” and 3” port models feature Aro’s patented “Unbalanced”, stall-free air valve design and bolted construction for leak-tight integrity. With maximum delivery rates of 172 GPM (2”) and 237 GPM (3”), the new high-flow Pros are the ideal answer to big volume applications - where performance with economy are a must.

## Accessories

### Air Line Treatment Combination Unit | C28121-600

Unit contains Piggyback Filter/Regulator and Lubricator. Filter/Regulator features a 20 micron filter, poly bowl with guard and 5-125-psi gauge. Lubricator features a poly bowl with guard. Plumb directly to pump's air inlet.

**Service Repair Kits |** *Kit No. 637084 (air section)*  
*Kit No. 637081 (Nitrile lower pump end repair)*  
*Kit No. 637083 (Teflon lower pump end repair)*

### Muffler | 61879

Muffler reduces operating noise level of pump.

### Wall Mount | 61113

Wall-Mount Bracket Permits pump to be wall-mounted near fluid container. Bracket can also be attached to side of open 55-gallon drum.

Displacement per cycle:	.039-Gallons (.15-Liters)
Air Inlet: (Female)	1/4 -18 N.P.T.
Fluid Inlet:	Siphon Tube for 55-Gallon Drum
Fluid Outlet:	1/2 -14 N.P.T.F. - 1
Max. operating pressure:	100-psi (6.8-bar)
Suspended solids max. dia.:	3/32-in. (2.4-mm)
Shipping Weight: lbs (kg)	22 (10) Polypropylene, basic package 26 (11.8) Aluminum, basic package 36 (16.3) Stainless, basic package

### Drum Pumps

- Choose from Aluminum, Stainless Steel or Polypropylene body construction - ARO Drum Pumps are available in three body materials for optimum fluid compatibility.

### Drum Pump Packages

- Package Components Factory-Matched - ARO Drum Pump package components contain pre-specified, matching materials of construction for complete fluid compatibility.
- Choose from Basic to Complete - Drum Pump Packages can be ordered in 3 styles:
- Basic: Pump, Bung Adapter, Air Safety Shut-Off, Siphon Tube, Weather Seal and base
- Complete/Transfer: Basic Pump plus Fluid Hose or Fluid Hose with Non-Drip Nozzle
- Complete/Dispensing: Basic Pump plus Foot Valve, Hose and Dispensing Nozzle

### Pump Features

- 11-g.p.m. Flow Capability - Drum Pumps offer plenty of capacity to satisfy a broad range of transfer application volume demands.
- Stall-Free Operation - ARO Diaphragm Drum Pumps feature a patented “unbalanced” air valve design that avoids stall-out, even under low air-inlet pressures.
- Bolted Construction - ARO Diaphragm Drum Pumps utilize bolted fasteners for leak-tight integrity.
- 5-Year Warranty

## Accessories / Pulsation Dampeners Pro-Series Pumps

### Pulsation Dampeners

Diaphragm and piston pumps of any type have at least two points in their cycle where they provide no pressure or flow to a process. The unwanted result of this pressure fluctuation can often be material foaming, material pulsation, hydraulic shock or material splashing. While traditional pulsation dampeners can help reduce unwanted pulsation and other problems, they also require operator intervention and adjustments.

### Automatic Shock Blockers®

- Automatic Air Adjustment - compensates for fluctuations in fluid pressure without operator intervention.
- **Significant Pulsation Reduction - the new Shock Blockers deliver an average 60% - 80% pulsation reduction in high back pressure applications.**
- Built for High-Flow/Aggressive Fluid Applications - the 2" models can handle up to 159 in.<sup>3</sup> maximum fluid volume, and 3" models up to 509 in.<sup>2</sup> maximum fluid volume.
- Broad Material Range for Compatibility - choose from PVDF, polypropylene, groundable acetal (1" models) or aluminum, cast iron or stainless steel (2" & 3" models) body materials for optimum pump-to-pulsation dampener compatibility.
- Broad Diaphragm/Bladder Fluid Compatibility - choose from Santoprene, Nitrile, Teflon, Hytrel, Viton or Urethane for optimum fluid-to-diaphragm compatibility.
- Perfect for Process Applications - pulsation reduction in long piping runs helps prevent costly fluid pipe and downstream valve damage.
- Bolted Construction - for leak-free vessel integrity and a safer work-site.
- Ultra-Rugged Construction for Long Service Life - both inside and out, the new Shock Blockers are built tough to deliver worry-free, near pulse-free fluid handling.

# Diaphragm Pump Accessories Pro-Series Pumps

## EXHAUST THREADED MUFFLER KIT

### Description

Kit allows operator to pipe exhaust air away from application. Fits only non-metallic air motor section. 3/8" NPT exhaust port. (muffler not included)

**Order No.** 637438

## PE SERIES PUMP CONTROL

### Description

ARO Alpha™ 4-way valve supplies air to cycle pump. Features bonded spool plus many actuator/return and solenoid options. (pump not included)

1/4" body ported. Actuator/Return options. Solenoid coil voltage options.

#### Order No.

Model:	Actuator/Return:	Voltage:
A212SD-120-A	Solenoid/Solenoid	120-VAC
A212SS-120-A	Solenoid/Spring	120-VAC
A212SD-012-D	Solenoid/Solenoid	12-VDC
A212SS-012-D	Solenoid/Spring	12-VDC
A212SD-024-D	Solenoid/Solenoid	24-VDC
A212SS-024-D	Solenoid/Spring	24-VDC
A212PS	Pilot/Spring	
A212PD	Pilot/Pilot	

(Solenoid Valves require use of Connector, referenced on this page.)

Valve does not include connector, mufflers or fittings

## PE SERIES PUMPS WITH BOS SPECIALTY CODE

### Description

Replaces standard pump air valve. Operate pump with a remote four-way valve. Provides the ultimate cycle rate control for dosing and batching applications.

**Order No.** PE0XX-XXX-XXX-B0S

For 3/8" and 1/2" PD0 Series  
(Remote valve not included in model.  
See below for four-way valve options.)

## CYCLE SENSOR

### Description

Provides a closed contact output for monitoring pump operation. Can be used to monitor cycle rates, preventative maintenance and rough flow rate indication. Power supply and other devices required to gather, store or manipulate data. (pump not included)

**Order No.** 67386 3/8", 1/2", and 3/4" Non-Metallic Pumps (PD03-X, PD05-X, PD07-X)

67168 3/8" and 1/2" Non-Metallic Pumps (66605X-X)

67169 1", 1-1/2" and 2" Non-Metallic Pumps. 1" and 1-1/2" Metallic Pumps

67386 on PD05P-X-X-B

## COUNTDOWN BATCHER

### Description

Manual start batch counter kit controls the volume of fluid dispensed by controlling the number of pump cycles. (pump not included)

**Order No.** 67072 For 3/8", 1/2", 3/4" and 1" ported pumps

## CYCLE COUNTER KIT

### Description

Easy to install counter records up to 999,999 cycles. Kit includes necessary installation hardware. For fluid inventory, preventative maintenance and fluid metering.

**Order No.** 66975 for 3/8", 1/2", 3/4", 1", 1-1/2", 2" and 3" ported pumps

# Diaphragm Pump Accessories Pro-Series Pumps

## SOLENOID ACTUATION KIT

### Description

Control pump cycle rate with on/off signal from PLC or other device. Kit includes connector w/36" cable plus components and instructions to install on standard pump. For dosing and batching applications.

**Order No.** 67165-1 (24VDC) for 3/8" and 1/2" ported pumps

67165-2 (120VAC) for 3/8" and 1/2" ported pumps

67166-1 (24VDC) for 1", 1-1/2" and 2" non-metallic and 1", 1-1/2" metallic pumps (less 3:1 models)

67166-2 (120VAC) for 1", 1-1/2" and 2" non-metallic and 1", 1-1/2" metallic pumps (less 3:1 models)

## DIAPHRAGM PUMP SPEED CONTROLS

### Description

Controls air volume supplied to pump, thus permitting operator to control speed of pump. Can be panel mounted. Composite body.

**Order No.** 104104-N02 1/4" port size

104104-N04 1/2" port size

104104-N06 3/4" port size

## AIR CONTROL ACTUATION VALVES

### Description

3-way valve controls air supply to pump. Activation starts pump, deactivation cuts off air supply to pump and exhausts air from motor, which prevents stalling.

120 VAC

**Order No.** MQ3728-120-A for 1/2" and 1" pumps

H254SS-120-A for 1-1/2" pumps

MQ3729-120-A for 2" and 3" pumps

24 VDC

**Order No.** MQ3728-024-D for 1/2" and 1" pumps

H254SS-024-D for 1-1/2" pumps

MQ3729-024-D for 2" and 3" pumps

MQ3728-120-A used on 1/2" and 1" pumps

Solenoid valve requires use of connector. See below for connector information.

## MINI BATCH COUNTER

### Description

For simple batching applications. Used with cycle counter or flow meter to control fluid output from pump.

**Order No.** 67161-2

67161-2 Mini Batch Counter with 1" pump

## PNEUMATIC LIQUID LEVEL SENSORS

### Description

Used to control pump.

**Order No** 59916-1 to sense when fluid exceeds a desired level

59916-2 to sense when fluid falls below a desired level

## CONNECTORS

### Description

Connects valve solenoid to PLC or other control device. Female connector to male DIN of valve solenoid.

CBW

Straight connector with 36" horizontal cable located on back.

**Order No.** CBW

Straight connector with 36" vertical cable located on back.

**Order No.** CHW

CHW

# Diaphragm Pump Accessories Pro-Series Pumps

## WALL MOUNT

### Description

Conveniently mount pump above container. Made of heavy gage coated steel.

(pump not included)

<b>Order No.</b> 67388*	3/8" Pumps
76763*	1/2" Pumps
66100*	1" Metallic Pumps
62133	1-1/2" Metallic Pumps
67142	1" 3:1 High Pressure Pumps

\*(does not include mounting hardware)

76763 Wall Mount

## PNEUMATIC MATERIAL AGITATORS

### Description

Prevents fluid from separating. Mounts in opening on 5-gallon or 55-gallon drum covers.

**Order No.** 651100 5-Gallon containers, use with 651851 and 66971 drum covers

651103 55-Gallon drums, use with 66087 drum side-mount adapter. Use with 66197 or 67141 drum covers requires 75704 mount (3), Y8-58-C screws and (3) Y12-5-C nuts

651100 Agitator

## SIPHON TUBE

### Description

Used to draw fluid from 55-gallon drums. Straight tube when pump is mounted on drum; angle tube when pump is wall mounted above container. Plastic (PVC, PP, PTFE), Carbon Steel (CS) or 316 Stainless (SS)

<b>Order No.</b> 61412	Straight N.P.T. (male) PVD for 1/2" Pumps
65109	CS N.P.T. (female) for 1" Pumps
66779	PVC 36" N.P.T. (female) for 1" Pumps
66779-1	PVC, N.P.T. (female) 14.875" L for 1" pumps used with 275-gallon bulk tank
66779-2	PVC, N.P.T. (female) 49" L for 1" pumps used with 275-gallon bulk tank
66779-3	PVC, N.P.T. (female) 61" L for 1" pumps used with large bulk tanks

65109 Siphon Tube

## DRUM COVERS

### Description

Keeps debris from entering fluid supply. Accommodates diaphragm pump. Fits 5-gallon and 55-gallon containers.

**Order No.** 67055-B Stainless Steel, for 1/4" Pumps on 5-gal. containers

66971 Stainless Steel, for 1/2" Pumps on 5-gal. containers

# Piston Pump Accessories Pro-Series Pumps

## DRUM / WALL MOUNTS

### Description

Permits pump to be mounted near fluid containers. Can also be mounted on drum lip. For use with stub style 2:1 and 4:1 ratio pumps.

**Order No.** 61113 for N-Series air motor stub pumps fitted with bung adapters.

## WET-SOL "PLUS"

### Description

Designed to prolong packing life by keeping piston rod and packings wetted.

**Order No.** 66333-B Quart for NM2202X-X and NM2304X-X pumps

66334-B Gallon for NM2202X-X and NM2304X-X pumps

## MUFFLER

### Description

Reduces noise level of air exhaust to acceptable OSHA standards.

**Order No.** 61879 for use with 612041-X models.

## AIR LINE LUBRICANT

### Description

Used in air line lubricator to air motor. High quality "EP" extreme pressure gear oil. Non-detergent, rust or oxidation inhibited. Viscosity of 700 to 1000 S.U.S. at 100° F.

**Order No.** 62274 one quart bottle

## OVER-RUN CONTROL

### Description

Shuts off pump when excessive cycling occurs due to empty fluid supply container.

**Order No.** 635040 for 1/2" and 1" ported diaphragm pumps for 1:1, 2:1 and 4:1 ratio piston pumps

23644-400 for 1-1/2" and 2" ported diaphragm pumps

635043 for 3" ported diaphragm pumps

## DRUM COVERS

### Description

Keeps debris from entering fluid supply. Accommodates siphon hose and agitator. Fits 5-gallon containers.

**Order No.** 651851 Carbon Steel, for 2" and 3" air motor pumps

94422 Carbon Steel, 2" bung opening for 55-gal. containers

651851 Drum Cover

94422 Drum Cover

# Pump Airborne Noise Emissions Pro-Series Pumps

## Pump Airborne Noise Emissions

The pump sound pressure levels published below have been updated to an Equivalent Continuous Sound Level ( $L_{Aeq}$ ) to meet the intent of ANSI S1.13-1971. CAGI-PNEUROP S5.1 using four microphone locations.

	Pump Port Size (Inches)	Air Operating Pressure (PSI)	Cycles/Minute	Sound Pressure (LAeq)
<b>Diaphragm Pumps</b>	1/2	70	60	75.0 db(A)
	1	70	60	79.7 db(A) 80.6 db(A)
	1-1/2	70	60	81.0 db(A) 82.8 db(A)
	2	70	60	*85.0 db(A)
	3	70	50	*83.0 db(A)

## Material Service Guideline

This chart is a quick reference guide. Always check material compatibility with a trusted chemical guide.

	Maximum Operating Temp Limit F (C)	Chemical Resistance	Scale 1 - 5 (5 is best) Abrasion Resistance	Flex Life*
<b>Acetal</b>	180 (82)	3	3	-
<b>Aluminum</b>	-	1	3	-
<b>Cast Iron</b>	-	3	4	-
<b>Geolast (Nitrile Based)</b>	180 (82)	2	2	3
<b>Hastelloy C</b>	-	5	-	-
<b>Hytrel</b>	150 (66)	2	4	4
<b>Neoprene</b>	200 (93)	2	2	3
<b>Nitrile</b>	180 (82)	2	2	3
<b>Polypropylene</b>	175 (80)	4	2	-
<b>Polyurethane</b>	150 (66)	1	4	4
<b>PTFE</b>	225 (107)	5	2	4**
<b>PVDF</b>	200 (93)	5	2	-
<b>Santoprene</b>	225 (107)	4	4	5
<b>Stainless Steel (300 Series)</b>	-	4	4	-
<b>Stainless Steel (400 Series)</b>	-	3	5	-
<b>Viton</b>	350 (177)	4	2	1

\* Applies to diaphragms only.

\*\* Increased flex life with use of santoprene diaphragm backer.

**NOTE:** Temperatures are reference for materials only. Refer to operator's manual for maximum pump operating temperature.

# Progress in Motion

For more than 100 years, we've helped drive innovation with revolutionary technology — creating new standards for how the world gets work done. We've done it by producing class-leading Ingersoll Rand / ARO pump and dispensing technologies, and by knowing our customers' industries and the demands placed on productivity and quality.

No matter what your product, process, or location, Ingersoll Rand / ARO offers a broad range of pumps and accessories, fully customizable dispensing systems, and a worldwide distribution and service network guaranteed to solve any fluid handling challenge.

## **Piston Pumps**

Ingersoll Rand/ARO Piston Pumps are used in some of the toughest applications throughout industry. This broad range of pumps are used with low-to-high viscosity fluids for general transfer, fluid recirculation and extrusion.

## **Extrusion Packages**

Extrusion Packages allow you to get an application up and running as easily as possible. These are divided into three categories: lift mount, single-post rams and two-post rams. In all cases, the package comes ready to use, no assembly required. Attach an outlet hose, fluid container and air supply, and your Ingersoll Rand/ARO Extrusion Package is up and running.

## **Dispensing Systems**

Ingersoll Rand Dispense Systems creates turnkey systems for automatic and manual dispensing applications. Our complete dispensing solutions are configured from standard components to meet customer specific requirements for applications within many different industries.

## **Lubrication Equipment**

Ingersoll Rand lubrication equipment has a full range of products that will keep all types of fluids moving efficiently. They are backed by more than 70 years of experience in pump and air system technology, and include models specifically designed for popular applications.

## **Pneumatic Valves**

Ingersoll Rand/ARO offers a full line of pneumatic valves to meet all your needs. Valves are offered in configurations of 2-, 3-, and 4-Way, available with electric, manual, mechanical, and pneumatic actuators. Miniature to full size valves to fit any application. A line of accessory and specialty valves are also available.

## **Pneumatic Cylinders**

Small bore non-repairable interchangeable cylinders, round and square compact, interchangeable cylinders perfect for OEM and MRO applications, as well as medium-heavy duty round line repairable cylinders. NFPA, interchangeable cylinders are available in extruded aluminum barrel up to 4" bore and in an entirely stainless steel cylinder with tie rod construction up to 8" bore.

## **Air System Components**

With Ingersoll Rand /ARO brand filters, regulators, and lubricators (FRLs) in your operation, you get a cost-effective solution to increasing the life of your pneumatic equipment. You can save space, time, and piping costs. Our FRLS also give you greater mounting flexibility and convenience.

ARO Diaphragm Pumps are backed by a 5-year warranty on materials and workmanship for your purchasing peace of mind.

ARO's Pump design and manufacturing operations have demonstrated compliance with the quality process, health and safety, technical file and multi-lingual standards set forth by the FEM (Federation Europeene de la Manutention) for the European Union (Communitie Economique).

Ingersoll Rand Industrial Technologies provides products, services, and solutions to enhance the efficiency and productivity of our commercial, industrial, and process customers. Our innovative products include air compressors, air systems components, tools, pumps, material and fluid handling systems and microturbines.
